This year at the **Jungle Dance** in Africa all of the animals are very excited to take to the dance floor. They each have practised a new routine and can't wait to show it off. The number or numbers the animals land on is their score given by the judges out of **20/30/50/100**. You are going to work out each of their scores by answering some of the questions below. Good Luck!

In your exercise book, draw lines to create a table. Use the 100 square to help you answer **6** questions of your choice from the boxes below. Write your answers to the questions inside the table in your exercise book.

Each question is levelled: **Level 1** **Level 2** **Level 3** **Level 4**
